

To protect your door, we require all six sides to be finished with a minimum of three coats of clear finish within 30 days of receiving it.

Your door must be shielded from the elements with an overhang of at least half the distance from the unit threshold to the overhang ceiling.

Inspect your door for damage often, clean it regularly, and provide maintenance as needed. We recommend a clear coat every year.

To prevent warpage, we recommend that all doors over 6'8" be equipped with a multipoint lock.

Avoid product modifications not performed by DSA or a DSA authorized representative.

In the case of a warranty concern, please submit a claim in writing or by email to Warranty@DSADoors.com.

Please refer to the above reminders for a general idea of DSA's maintenance recommendations and warranty requirements. Review DSA's Limited Warranty online at DSADoors.com/Resources for complete warranty information and more helpful information to take care of your door for years to come. Please contact us if you have further warranty or care questions.
