

About DSA's Impact-Rated Wood Doors

- **Tested for Hurricane Protection**

Our impact-resistant doors are designed to endure flying debris that would shatter the glass in a regular door. Our doors are rigorously "missile" tested to withstand repeated impact from a 2x4 traveling up to 50 mph. In the event of exterior glass damage, our impact glass remains secure in its frame to prevent water and debris infiltration.

- Approved for use in High Velocity Hurricane Zones (HVHZ)
- Design Pressure Rating of ± 70.0 PSF (DP-70)
- Tested for Air Infiltration and Water Infiltration
- Offers Forced Entry Resistance Protection
- Clear, Turtle Tint, White Laminated & Flemish IG Low E Impact Glass available (Lead times may vary)
- Constructed with Multipoint locks and 2¼" slabs
- FL Inswing Approval Code FL#21873.4, FL Outswing Approval Code FL#21873.5
