POWERED BY **accoya**

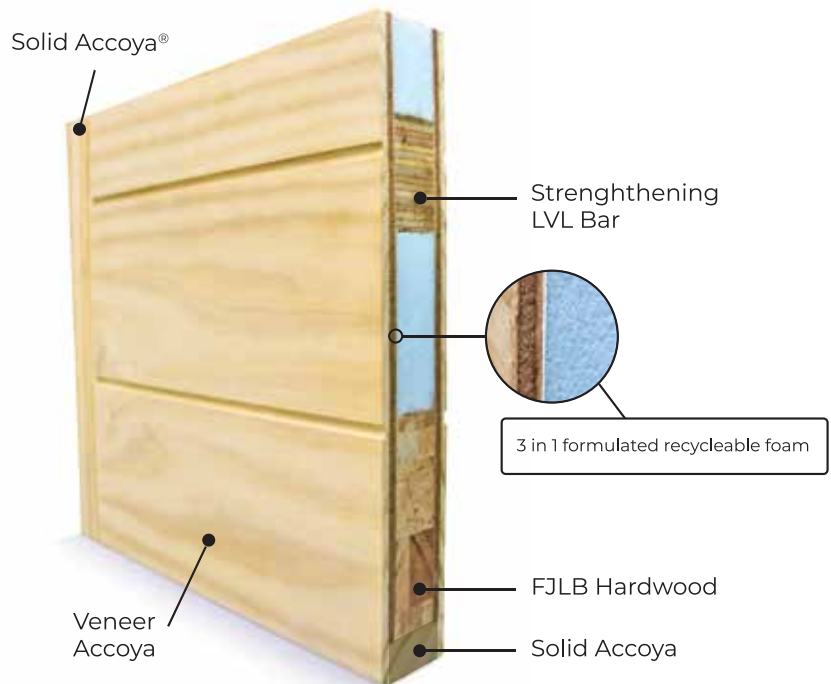

Our passion to source for the right timber species for outdoor use, landed us into the discovery of the Accoya® wood species. This wood is made from proprietary modified timber with a process called, acetylation.

No other timber comes close and can stand against the most challenging environments. DSA sources the DNA of this wood species from sustainable forests with a FSC certification.

With the nature of timber, DSA's new Accoya® wood door allows us to draw carbon from the air and store it in your homes while our virgin forest concession produces oxygen.

SUPREME DOUBLE IG LOW E GLASS with *Super Spacer* (warm-edge flexible spacer)

FEATURING:

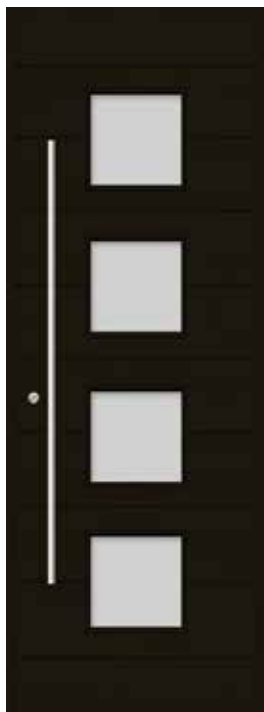

- Beyond soft coating Low E Glass
U-factor of our Double glazes in BTU/(hr-ft²-°F)

| | |
|------------------------|-----------------------|
| - Modena series : 0.28 | - French doors : 0.28 |
| - Urban series : 0.24 | - Bifold doors : 0.22 |
- Our spacer boost energy efficiency and surpass the durability of any traditional metal IG systems because they adapt with fluctuating temperatures to protect against stress cracks that cause seal failure.
