

Wynstellar®

*Exclusively available
at DSA Doors*

Modena 4LT

Our Wynstellar Collection combines modern design with industry-leading technologies, including encapsulated Accoya wood, CLPF construction, and Low E glass. Wynstellar doors outlast challenging environments with style.

- 1 Constructed with encapsulated Accoya wood, an enhanced and stabilized wood that resists moisture, shrinkage, swelling, jamming, insects and fungi damage.
- 2 Modena units feature an innovative CLPF core, which utilizes recyclable foam and hardwood veneer for the highest thermal performance.
- 3 Includes Low E coated glass, which shields your interior from ultraviolet and infrared light without compromising your home's visible light.
- 4 Offers a five year limited warranty without any overhang required or paint restrictions, due to its impressive durability.
